

Scalable bulk procurement of photovoltaic integrated energy storage cabinet

Overview

Featuring lithium-ion batteries, integrated thermal management, and smart BMS technology, these cabinets are perfect for grid-tied, off-grid, and microgrid applications. Explore reliable, and IEC-compliant energy storage systems designed for renewable integration, peak.

Governor Kathy Hochul today announced the launch of New York's first Bulk Energy Storage Request for Proposals (RFP), intended to procure one gigawatt (GW) of bulk energy storage as part of New York's 6 GW Energy Storage Roadmap. Adding bulk energy storage to New York's grid will lower costs.

On July 28, 2025, Governor Kathy Hochul announced the launch of New York State's first bulk energy storage competitive solicitation. In this initial solicitation (the 2025 "Index Storage Credit Request for Proposals," or "ISCRFP25-1"), the New York State Energy Research and Development Authority.

Applications are invited in New York for the state's first competitive solicitation for a gigawatt of grid-connected energy storage facilities. Kathy Hochul, the governor of the East Coast US state, announced the launch of the first of three Bulk Energy Storage requests for proposals (RfPs) earlier.

Featuring lithium-ion batteries, integrated thermal management, and smart BMS technology, these cabinets are perfect for grid-tied, off-grid, and microgrid applications. Explore reliable, and IEC-compliant energy storage systems designed for renewable integration, peak shaving, and backup power.

Developers and clean energy investors now have a major opportunity to secure long-term revenue through New York State's first bulk energy storage solicitation. Announced by Governor Kathy Hochul on July 28, 2025, this Request for Proposals (RFP) invites participants to compete for 15- to 25-year.
