

# Senegal backup solar cabinet system

## Overview

---

The Dakar Cabinet Energy Storage System Project represents a groundbreaking initiative in West Africa's renewable energy landscape. Designed to stabilize power supply across Senegal's capital region, this lithium-ion battery solution addresses frequent blackouts while supporting.

We innovate with solar photovoltaic plant design, engineering, supply and construction services, contributing to the diversification of the energy matrix in our. We provide operation and maintenance services (O&M) for solar photovoltaic plants. These services are provided by a team of world-class.

The 50kW 80kWh Commercial High Voltage Battery Rack features a standard cabinet design, allowing multiple units to be connected in parallel for scalability. It is built with a high degree of protection, making it suitable for operation in a . ESS manufactures standard and custom battery cabinets.

Senegal and sustainable infrastructure developer Africa REN have commissioned the Walo Storage facility in Bokhol, marking the first grid-connected solar-plus-battery installation of its kind in West Africa. The €40 million project includes a 16 MW photovoltaic plant paired with a 10 MW/20 MWh.

Senegal's first solar-plus-storage plant, built by Africa REN in Bokhol, combined 16 MW solar and 10 MW / 20 MWh storage for grid stability. [Link copied!Copy failed!](#) The Walo Storage facility has combined solar generation with battery storage to deliver frequency regulation and enhance Senegal's.

The West African nation, where over 60% of the population have access to

electricity—one of the highest in the sub region—aims to achieve universal energy access by 2030. Senegal has begun commercial operations at a new solar energy facility that combines photovoltaic power with lithium-ion battery.
