Can solar-plus-storage meet rising demand without gas?

Energy Innovation analysis shows clean energy can come online fast enough to meet rising demand without needing gas to fill the gap, and solar-plus-storage has stepped up.

How has solar-plus-storage helped keep the lights on?

Adding 19 GW of solar and 6.2 GW of storage since 2019 helped keep the lights on – an 800% increase in solar and 5,500% increase in battery storage over that period. Solar-plus-storage is solving demand growth by providing reliable power when the grid needs it most – during peak hours.
