

Spain Port Outdoor Container 60kWh

Overview

Will the port of Barcelona have a 'super plug'?

The Port of Barcelona already has the first “super plug”, which allows container ships to turn off their engines and connect to the power grid.

Does Barcelona have a 'super-plug-in' for container ships?

Six years before it becomes mandatory in European ports, Barcelona has already done its homework. Six years before it becomes mandatory in European ports, Barcelona has inaugurated the first “super-plug-in” for container ships in the Mediterranean (PierNext). Hamburg in January and now Barcelona.

How does the port of Barcelona work?

In the next two years, the Port of Barcelona will carry out two pilots to test the connections with two types of ships; container ships and ferries. The operation is as follows: when the ship arrives at the dock, it shuts down the auxiliary engines and connects to the shore grid to generate electricity.

Can a port supply electricity from renewable sources?

In the case of the Port of Barcelona, this is the first system for supplying electricity from renewable sources to ships in a container terminal of a Mediterranean port. This service has begun to be offered at the Hutchison Ports BEST terminal and is part of the NEXIGEN plan, which has five phases to be completed by 2050.
