

# Sri lanka new energy group urban energy storage investment

## Overview

---

This 600 MW project is designed to store surplus energy generated from solar and wind sources, enhancing grid stability and maximizing renewable energy utilization. Situated in Aranayake and Nawalapitiya, the project will consist of two reservoirs linked by a 2.5 km tunnel.

This 600 MW project is designed to store surplus energy generated from solar and wind sources, enhancing grid stability and maximizing renewable energy utilization. Situated in Aranayake and Nawalapitiya, the project will consist of two reservoirs linked by a 2.5 km tunnel.

As Sri Lanka moves steadily toward a cleaner and sustainable energy future, energy storage is an emerging component of this transformation. The rising electricity demand driven by economic and population growth, along with the target of achieving 80% renewable energy integration by 2030, presents.

The investment will double Greenpower SL's rooftop solar portfolio and explore new technologies such as energy storage and nature-based solutions. Colombo, Sri Lanka - The Private Infrastructure Development Group (PIDG) has invested USD 12m into Greenpower SL, a renewable energy platform with an.

WASHINGTON, June 20, 2025— The World Bank Group today approved a new \$150 million program to support Sri Lanka's move toward clean, reliable, and affordable energy. The program— Secure, Affordable, and Sustainable Energy for Sri Lanka —will support the country reduce its reliance on expensive.

This innovative venture is set to revolutionize the country's renewable energy sector, offering a stable and efficient solution for integrating solar and wind power into the national grid. The project underscores Sri Lanka's commitment to a greener future by reducing dependence on fossil fuels and.

The Asian Development Bank (ADB) multilateral finance institution has approved a loan to upgrade Sri Lanka's grid infrastructure. ADB said yesterday (25 November) that the US\$200 million loan will fund the Power System Strengthening and Renewable Energy Integration Project, which includes the.

rage system (BESS), powered by solar photovoltaic (PV) technology. energy supply

to power systems, regardless of weather conditions, renewable energy by 2030 policy target for electricity generation. The country currently sources power from a relatively high share of renewables due to hydroelectricity. How can Sri Lanka achieve 70 percent of its electricity by 2030?

“We are excited to work with both the government and private sector to make this shared vision a reality. The program will support new solar and wind energy projects that will add 1 gigawatt of clean electricity to the grid – bringing Sri Lanka closer to its goal of generating 70 percent of its electricity from renewable sources by 2030.

What is Sri Lanka's energy reform program?

The program also supports the upgrades to Sri Lanka's electricity grid, enabling it to better handle renewable energy and reduce power outages. This modernization will help stabilize electricity prices and improve energy access for households and businesses across the country.

Is Sri Lanka's energy transition a good idea?

“Sri Lanka's energy transition is an opportunity to expand clean energy, improve energy access, and build long-term resilience,” said Imad N Fakhoury, IFC's Regional Director for South Asia. “Achieving this requires close collaboration and investment from both public and private sectors.

How will the World Bank support Sri Lanka?

The World Bank Group today approved a new US\$150 million program to support Sri Lanka's move toward clean, reliable, and affordable energy. The program, titled “Secure, Affordable, and Sustainable Energy for Sri Lanka”, will support the country reduce its reliance on expensive fossil fuel imports and accelerate its shift towards solar and wind.
