Overview

What is a lithium battery pack and its casing?

What's a Lithium Battery Pack and Its Casing?

A typical Li-ion battery pack consists of:

- The Enclosure: Usually split into an upper cover and a lower case (or tray).
- Li-ion Cells: The core energy storage units.
- High-Voltage (HV) Components: Connectors, busbars, etc., for power transfer.

What are the components of an EV battery pack?

- Low-Voltage (LV) Components: Connectors, wiring harnesses for communication and control (like the Battery Management System – BMS). (See Fig 1: Basic Battery Pack Structure) The enclosure holds all these parts securely and mounts the entire battery system to the EV chassis or boat structure.
- Lower Case/Tray: This is the workhorse.

What is a battery pack structure?

(See Fig 1: Basic Battery Pack Structure) The enclosure holds all these parts securely and mounts the entire battery system to the EV chassis or boat structure.

- Lower Case/Tray: This is the workhorse. It bears most of the weight of the cells and internal components and requires significant structural strength.
