

# Tashkent energy storage lead-acid battery enterprise

## Overview

---

What is EBRD doing with Tashkent solar PV & energy storage?

Nandita Parshad, Managing Director, Sustainable Infrastructure Group at EBRD, said: “We are proud to partner with ACWA Power and co-financiers on the pioneering Tashkent Solar PV and energy storage project in Uzbekistan, the largest of its kind in Central Asia. The project is core to Uzbekistan's ambition to install 25GW of renewables by 2030.

Why is ACWA partnering with Tashkent Riverside?

The agreement today for the Tashkent Riverside project reflects the strong trust placed in ACWA Power as the private sector partner, and one of the global leaders in renewables and energy storage.

What's going on with the Tashkent Riverside Project in Uzbekistan?

From pv magazine ESS News site Saudi-listed ACWA Power has announced the completion of the dry financial close for the \$533 million Tashkent Riverside project in Uzbekistan, near the country's capital city of Tashkent. The greenfield development will involve a 200 MW solar plant and a 500 MWh BESS that will serve to stabilize the Uzbek grid.

Will Uzbekistan generate 40% of its electricity from renewables?

By 2030, Uzbekistan is aiming to generate 40% of its electricity from renewables. The BESS will help to mitigate the effects of intermittency that are inherent in renewable energy sources, storing excess electricity generated during times of high production and make it available during periods of low production.
