

Technical parameters of 500kWh mobile energy storage battery cabinet

Overview

It has the functions of large capacity V/f source, parallel operation mode, on-line switching, short circuit support, high protection level, cabinet design and so on, so as to ensure efficient, safe and stable operation of the product.

It has the functions of large capacity V/f source, parallel operation mode, on-line switching, short circuit support, high protection level, cabinet design and so on, so as to ensure efficient, safe and stable operation of the product.

PCS can be accurate and efficient implementation of various cell types, voltage level and power level of the battery charging task, bidirectional power flow, which can charge the battery energy storage battery, can also convert the DC power into AC power to feed into the grid. Equipped with.

High-Rate Fast Charging: Suitable for fast charging of electric heavy-duty trucks, engineering machinery, 3. Rapid Deployment: Industrialized mass production, avoiding hardware investments like land and transformers. 4. Convenient Configuration: Resources can be flexibly allocated based on regional.

ensive controlover the system's operational status and risks. One-stop delivery shortens th lation handling mechanism responds to preset fault scenarios. Customized BMS (Battery Management System provides comprehensive measurement and protection functions. It sup .

projects. The standardized 20feet container system can be configured with 1075kWh500kW energy storage system. The standardized and prefabricated safety hazards caused by local installation differences and management risks. It consumption, etc., and ensures the normal operation of the power system.

Introduction to the energy storage system: The battery part is composed of five battery cabinets, each of which is directly connected to a 100kW PCS energy storage converter module, need not DC combiner cabinet, eliminating circulating current and effectively improving the utilization rate of.

A flexible mid-node battery energy storage system (BESS) with rapid deployment and remote monitoring - Our 500 kW/250 kWh battery solutions are backed by engineering expertise to help reduce emissions, fuel consumption, and costs. Built

for rapid deployment, our 500 kW capacity batteries are a fast.
