

Thailand solar energy storage cabinet 250kw

Overview

Is energy storage a new business model in Thailand?

Energy storage is in its infancy in Thailand, and new business models are already emerging. As the regulatory framework adapts to accommodate new players in the market, we expect to see greater penetration in this area. Notes Energy Policy and Planning Office, Ministry of Energy, electricity statistics.

Will Thailand's power development plan be revised in 2024?

Moreover, a revision to Thailand's Power Development Plan (PDP) is expected in early 2024, meaning amended renewable targets are likely to be announced, allowing additional wind and solar to be procured.

Is Thailand reliant on fossil fuels?

Thailand's grid remains heavily reliant on fossil fuels, with natural gas accounting for 57 per cent of generation and domestic coal accounting for an additional 15 per cent. Renewables only account for ten per cent of overall generation, although this figure includes biofuels and waste-to-energy.
