

Three-phase photovoltaic cell cabinets for highways

Overview

Three phase sectionalizing cabinets are made of rugged fiberglass and offer flexible installation options. The hinge-less lid design allows access to the cabinet from the top and sides, and an optional removable front panel is available on one unit.

Highline® energy products, highly-durable and lightweight Millennium line of compression molded transformer box pads to our low-cost, stackable box pads, Oldcastle offers the quality and customization you need for any application. Oldcastle Infrastructure manufacturers two styles of fiberglass.

P-107 stainless steel locking system provides double locking. Various model's mounting plates accommodate a variety of 15/25/35 kV, 200-600A junctions. The cabinets four eye-bolts allow the line-person to simply hook-up the cabinet, position it over the cables, and place it in the excavated area.

CT Cabinet, 3-Phase 400-1200 Amp with Lugs, Type 3R, are used in indoor or outdoor applications. These cabinets provide an assembly solution for three-phase service from 400-1200 amp line load terminations for each phase and neutral. Hardware to moun. Please log in or sign up to start adding.

Offering the broadest line of aesthetically pleasing sectionalizing cabinets and pedestals, Hubbell is sure to have a core product that satisfies even your toughest application requirements. In addition to a wide range of core products and options, Hubbell can help customize a solution to achieve.

CJPF-42 three phase pad mount cable junction pedestal is made with fire retardant fiberglass and protected with UV stabilized gel coat . Optional 200/600A 15/25 kV 2/3/4-Way junctions are also offered. We certify that all cable junction pedestals conforms to IEEE C57-12-28 Pad mounted Enclosure.
