

Tokyo energy storage management project

Overview

What is an energy storage project?

An energy storage project is a cluster of battery banks (or modules) that are connected to the electrical grid. These battery banks are roughly the same size as a shipping container. These are also called Battery Energy Storage Systems (BESS), or grid-scale/utility-scale energy storage or battery storage systems.

Where is Korea's energy storage facility located?

The Korean electrical equipment and automation systems company announced yesterday (14 April) that it will deploy the large-scale standalone energy storage facility in Watari, a largely agricultural town on the Pacific coast in Miyagi Prefecture, about 330km northeast of the Japanese capital, Tokyo.
