

Türkiye subsidizes new energy storage

Overview

According to Embassy of the Republic of Turkey, Turkey has introduced a number of incentives and regulations to achieve its goal of 80 gigawatt-hours (GWh) of energy storage by 2030, while agreements for the energy sector to set up cell and battery factories have exceeded \$1 billion.

According to Embassy of the Republic of Turkey, Turkey has introduced a number of incentives and regulations to achieve its goal of 80 gigawatt-hours (GWh) of energy storage by 2030, while agreements for the energy sector to set up cell and battery factories have exceeded \$1 billion.

Türkiye is making significant strides toward its 2053 net-zero carbon emissions goal by ramping up investments in energy storage systems according to Türkiye daily. The Energy Market Regulatory Authority (EMRA) approved a 35-gigawatt-hour (GWh) capacity allocation for grid-scale storage projects.

According to Embassy of the Republic of Turkey, Turkey has introduced a number of incentives and regulations to achieve its goal of 80 gigawatt-hours (GWh) of energy storage by 2030, while agreements for the energy sector to set up cell and battery factories have exceeded \$1 billion (TL 35 billion).

Türkiye's energy transition has created a decisive opening for battery energy storage systems (BESS) —especially when paired with solar (GES) or wind (RES). Recent regulatory changes allow developers to co-locate storage with renewables and obtain licenses without competitive auctions, catalyzing.

ANKARA, May 16, 2024— The Government of Türkiye, the World Bank, and Turkish development banks, signed today an agreement for a \$1 billion program on 'Accelerating the Market Transition for Distributed Energy'. This innovative program will help establish and expand Türkiye's market for distributed.

Türkiye is making significant strides toward its 2053 net-zero carbon emissions goal by ramping up investments in energy storage systems according to Türkiye daily. The Energy Market Regulatory Authority (EMRA) approved a 35-gigawatt-hour (GWh) capacity allocation for grid-scale storage projects.

Türkiye plans to reach 7.5 GW of battery energy storage and 5 GW of electrolyser

capacity by 2035. While batteries play a key role in short-term (hourly) balancing, electrolysers will enable seasonal energy storage by converting surplus electricity—especially from solar and wind—into e-fuels. To. Where does Türkiye invest in energy storage?

Global energy storage investments have surpassed 150 GWh. Türkiye has already begun installations in Hungary, Bulgaria, and Spain, leveraging its geographic advantage close to Europe. Tokcan highlighted the importance of local expertise in manufacturing, system management, and maintenance to avoid dependency on foreign firms.

How big is Türkiye's energy storage capacity?

Türkiye's 35 GWh storage capacity accounts for grid-scale projects alone. Global energy storage investments have surpassed 150 GWh. Türkiye has already begun installations in Hungary, Bulgaria, and Spain, leveraging its geographic advantage close to Europe.

How will Türkiye improve energy security?

The government aims to significantly scale-up solar energy to 52.9 gigawatts (GW) by 2035 from 9.5 GW in 2022. The target for battery storage is 7.5 GW. With these and other clean energy measures, the government is boosting energy security as an integral part of efforts to decarbonize Türkiye's economy by 2053.

TAX FREE

ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled
