

# Uninterruptible power supply battery cabinet self-operated

## Overview

---

How do uninterruptible power supplies work?

Uninterruptible power supplies (UPS) automatically test their batteries regularly, typically every 24 hours, by placing a load on the battery set and monitoring the discharge performance. This is how they work.

What does a battery cabinet power?

Battery cabinets are designed to hold batteries used to power an uninterruptible power supply (UPS) system. In the event of a power disruption or outage, the UPS system ensures that your devices continue to operate from the energy stored in the batteries in the battery cabinet.

What is the battery capacity of the UPS system?

The UPS system uses batteries in the battery cabinet to provide power during disruptions. The battery capacity is 34.6 kWh. The system is lithium-ion based and can support up to 5 MW in parallel.

What is mpinarada integrated battery cabinet solution?

MPINarada integrated battery cabinet solution offers aturn-key battery and battery cabinet option for UPS battery backup. Cabinet solutions are available in both size and color to match most UPS system manufacturers.
