The first Lithuanian smart battery "Nova" that stores electricity produced from the sun has been introduced, which can already be purchased by producing household consumers and small businesses. The smart battery was manufactured by SoliTek, a company belonging to the BOD Group. The new battery.

However, energy storage projects (both electricity and heat) are so far focused on energy storage and balancing for short-term – daily or weekly periods only. Electricity sector Lithuania, Latvia and Estonia have seamlessly disconnected from the Soviet-era Russian electricity system and started.

IPP E energija Group has started building what it claims is the largest 'private' BESS project in Lithuania, a few weeks after the Baltic region decoupled from Russia's electricity grid. The 120MWh battery energy storage system (BESS) project near Vilnius, the capital of Lithuania, will come online.

With electricity prices in Lithuania rising 22% since 2022 (National Energy Regulatory Council), Vilnius residents are turning to solar+storage systems like never before. These systems act as personal power banks for your house, storing cheap nighttime energy or solar power for daytime use. Not all.

Helsinki, 1.7.2025 —E energija group and Capalo AI have signed an agreement to trade and optimize the 120 MWh Vilnius Battery Energy Storage System (BESS), currently under construction near Vilnius. Scheduled to be operational by the end of 2025, the facility will increase Lithuania's national.

E-energija Group has commenced construction on Lithuania's largest battery

energy storage system (BESS) project, the 120MWh Vilnius BESS. This facility, which is set to become Lithuania's first commercial battery storage site, will significantly increase the country's storage capacity by around.
