

# Which IP54-rated communication power cabinet is more durable for 5G macro base stations

## Overview

---

What is IP54 rated cabinet?

The robust IP54 rated cabinet provides environmental protection from harsh applications where dust and humidity could severely impact system performance and equipment life-span. The pre-integrated cooling module delivers either 3.5 or 7.0kW of scalable cooling capacity while allowing for full rack U-space utilization for increased IT deployment.

What is the difference between IP55 and IP54?

Understanding the Ingress Protection (IP) code helps ensure enclosures meet environmental demands: Key Difference: IP55 offers better water protection than IP54, making it suitable for light outdoor exposure, though not as robust as IP65/66 for high-pressure or immersion scenarios.

Should I use IP54 or IP65+?

Your application is semi-outdoor, like an open warehouse or sheltered transport hub. Periodic water spray is expected but not at high pressure. You want higher protection than IP54 without the cost or weight of full IP65+. Direct exposure to pressurized water or outdoor storms is expected.

Should I use IP54 or IP65+ water protection equipment?

Periodic water spray is expected but not at high pressure. You want higher protection than IP54 without the cost or weight of full IP65+. Direct exposure to pressurized water or outdoor storms is expected. Equipment is installed in marine, underground, or industrial washdown zones.

## Which IP54-rated communication power cabinet is more durable for 5
